PROFILE

I'm Sebas Padilla: passionate about analytics, model development and market research, an industrial engineer and a Data Science master's student at Universidad EAN.

Along the way I found that the best tool for both was the same: data. Since then I've built dashboards, data pipelines and predictive models for sales and operations teams, and I've led market extrapolation and transaction analysis projects.

EXPERIENCE

Business Intelligence Analyst · Credibanco — 2024 — now

I develop, automate and deploy products for DaInsight, Credibanco's advanced analytics suite, and help create new products for clients and internal teams. I work on market and growth-potential analysis, segmentation, scenario, forecasting and geospatial models, and end-to-end campaign evaluation.

−40% data pipeline development time · New products and enhancements for DaInsight

BI Engineer · LQN — 2022 — 2024

I centralized the company's data with Azure data pipelines, built sales and operations dashboards, and developed predictive models in Python and Power BI.

Sales targets closer to reality

Communications and Quality Coordinator · Corporación Educativa Politécnico La Salle — 2020 — 2022

NPS tracking in Power BI, web analytics and process management.

−50% response time · −35% time on web flows · ISO 9001:2015 certification

University intern · Credibanco — 2020

Product analysis with Scrum and user experience measurement.

−20% information overload in the sales dashboard

SELECTED PROJECTS

MACHINE LEARNING

Which customers are about to leave?

Finding: contacting the top 15.5% by expected value wins; contacting everyone loses money.

MACHINE LEARNING · TEAM PROJECT

How many days does a patient have left in hospital?

Finding: the model cuts error to 6.19 days, 6.4% less than the historical baseline.

DATA

Where are Bogotá's new businesses born?

Finding: Ciudad Bolívar creates businesses at more than twice the rate of Chapinero.

MARKET INTELLIGENCE

Where to open a coffee shop in Bogotá

Finding: only Suba and Usaquén beat the city average on both adults and businesses per coffee shop.

EDUCATION

Master's in Data Science
Universidad EAN · 2026 — 2027 · in progress

Diploma in R and Python
Universidad Sergio Arboleda · 2023

Diploma in Data Analytics
Pontificia Universidad Javeriana · 2023

B.S. in Industrial Engineering
Universidad de La Salle · 2015 — 2021

Technical degree in Web Design and Multimedia
Colsubsidio · 2012 — 2014

Speaker
15th and 16th Regional Student Research Conference, RedCOLSI · 2018

Speaker
21st National and 15th International Student Research Conference, RedCOLSI · 2018

TOOLKIT

DATA & BI

Databricks · Snowflake · ETL · SQL · Power BI · Microsoft Fabric · Cloudera · Power Automate

MACHINE LEARNING

Python · R · Neural networks · Machine Learning · MLOps

METHOD

CRISP-DM · Data storytelling · UX design
